Does the submission have a short caption of no more than 150 words to explain the link with environmental sustainability and/or a solution to the problem and/or issue?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Is the title within 140 words?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Was the original illustrations/pictures attached separately digitally as .jpg, .png, .tif, or .gif format with a resolution of not less than 150-300 dpi?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Has the submission been disseminated to the following audiences? <input type="checkbox"/> School <input checked="" type="checkbox"/> Local community (Local newspaper, Local authority) <input type="checkbox"/> External media (National newspaper, etc.) <input type="checkbox"/> SNS (Facebook, Twitter, etc.) Link to the page: http://scoalabogdanestisv.ro <input type="checkbox"/> Other: please explain	

We all know that we like to breathe clean air and to admire the beauties of nature, but day by day it becomes more and more degraded. We walked along the river and noticed that Rasca river is becoming increasingly dirty water and so are its shores.

More likely unaware of the danger, some inhabitants of this village throw domestic waste in the water (PET, glass, household waste), despite the fact that they have been warned.

Due to the snow melting, of rain, all impurities from the waste flowing into the river, causes negative effects on fauna, flora and groundwater.

CONCLUSION: The author Wants to draw the attention to the local authorities, the inhabitants of this village, being the responsibility of us all for a clean environment and a healthy life. This is a solution in time, the advantage lies in waste reduction and recycling
